The diagram illustrates a custom keyboard layout with two layers. **Layer 0** (the top layer) includes keys for numbers 1-0 with symbols, letters Q-Z, function keys like Tab, Esc, and % (hash), and navigation keys like Left Ctrl, Left Alt, and a key with a house icon. **Layer 1** (the bottom layer) includes keys for numbers 1-0 with symbols, letters Y-Z, function keys like Esc, % (hash), and navigation keys like PgUp, PgDn, and a key with a house icon. The layout is designed to be ergonomic, with keys arranged in a way that minimizes hand movement.

The diagram illustrates a split keyboard layout. The left section is a standard QWERTY layout with function keys (F1-F5) at the top. The right section is a similar QWERTY layout with function keys (F6-F11) at the top. At the bottom, there are two angled sections. The left angled section contains keys for brightness, contrast, and volume, along with Home and End keys. The right angled section contains keys for window management (maximize, close), arrow keys, and Page Up/Down keys.

The diagram illustrates a split keyboard layout. The left half features a standard QWERTY arrangement with modifications, including a dedicated 'LT → 2' key and a 'Left Alt' key. The right half mirrors the standard layout but includes a 'WWW Back' key. The central bridge connects the two halves with keys for 'Del', 'Home', 'End', 'PgUp', 'PgDn', and 'WWW Back'.
